

Unrig US Elections – 2020

(Top three critical areas of engagement)

Quick Start

1 Guard Against Vote Theft

Replace paperless machines with verified voting systems.

Would you fully trust a process in which our ballots are deposited behind an electronic curtain, and results emerge some time later telling us who won, but there is no way to audit and verify the tallies?

The 2016 Presidential election held in Pennsylvania, for example, where hackable, paperless touchscreen voting machines were used by 80% of voters, revealed a state lacking the most basic audit and recount protocols for fairly determining the accuracy of their “machine count.”

2 Stop Voter Stalking

What's Voter Stalking?

Any activity or policy whose aim is to deceive, intimidate, harass or otherwise challenge legitimate voters in order to deny or suppress their votes — we can stop this!

The Democratic National Committee (DNC) has, for example, recently adopted a [resolution](#) to:

- 1) challenge the attempted purge of 7 million voters in 30 states through the Interstate Crosscheck program's biased methodology which unfairly targets ethnic minorities, and
- 2) expedite a 50-state strategy to prevent any undermining of US citizens' rights to vote, and have their votes accurately counted as cast.

3 Organize Locally

— Because the states are in charge of their elections, local activist groups and individuals can be most effective by engaging with their local county Registrar's Office, state's Secretary of State's Office, and state legislators.

We believe that the 2020 elections will demonstrate a public mandate for a far less corporate-dominated agenda — *if* all eligible voters are allowed to vote and have their votes counted accurately. Permitting vote theft to continue, or delaying corrections past 2020, will further empower the ruling oligarchy to victimize us, our neighbors... and our planet.
